

## REVIEWING w3schools.com Website

Theme : Podcast as usual + Ads website

Host :

1. Revani Nanda Putri
2. Vera

Guest Star :

1. Tissa

### Script

#### Intro

Vera : Welcome to our first exiting episode of “What Do You Do Lately As A Student In College” im Vera.... number ....

Reva :And im Revani nanda putri number 24, and we are your friendly co-captains on this journey through unexpected insights

Vera : That’s right reva, and today we are joined by a very special guest star, someone whose will light up our airwaves..... Tissaaaaaa

Tissa : Hai people im tissaa... number .... And im invited to be here, ready to share some incredible knowledge

#### Main convo

Vera : Fantastic! Well, we are exited to have you tissa, and lets start by delving into your college days. Could you tell our listener what you studied lately as a student?

Tissa : Absolutely, im learning how to make a system using Java language code, I bet you guys don’t know about it

Reva : Ahh javaaa, I knew about it, when I was in vocational high school i used to learn java programming language

Vera : wow rev u must be an expert now

Reva : Tissa now I wanna know, what kind of websites or apps do you use for learning programming language?

Tissa : I use w3schools.com, [the website provides examples of java programming language and many more for beginners \(simple present\)](#)

Vera : so for our beloved audience if u don’t know, [it primarily functions as a reference guide \(describe emphasizing the function\)](#)

Reva : okay tissa, whats your opinion if u comparing this website to the other websites?

Tissa : When you compare w3schools.com to other websites you will notice its emphasis on interactive learning than the other websites (comparing)

Vera : I agree with tissa, but guys the website's navigation has been found to be less intuitive, making it harder to find specific content or tutor for beginner like me. (passive voice) Have you ever feeling like this?

Tissa : of course I do vera, and before I discovered w3schools.com, I had difficulty finding up-to-date resource for learning java programming language (time words).

Reva : okay then how can you keep your knowledge up-to-date?

Tissa : to keep my own knowledge up-to-date, im used to checking out the the latest trend on w3schools.com (to-invinitive)

Vera : nice technique tis, just click on the "try it yourself" button to experiment with the code (imperative)

Tissa : And Lastly, don't forget to checkout the website forums, where you can connect with other learners and professionals (sequencers)

Reva : Absolutely, we appreciate each and every one of you who turned in. and big shoutout to our fantastic guest starr tissaaa, for sharing your experience with us.

Tissa : it was a pleasure to be here, and I had a great time discussing this website with you both

Vera : See you next time, keep learning, stay inspired, and, as always, stay curious.

All : goodbye!
